

Stentophon Integration

Professional Engineering Services

DVTel's Professional Engineering Services (PES) Group provides custom automation and operation and 3rd party integration to DVTel's intelligent Security Operations Center (iSOC) platform so that every DVTel solution has the ability to be tailored to meet the requirements of the customer.

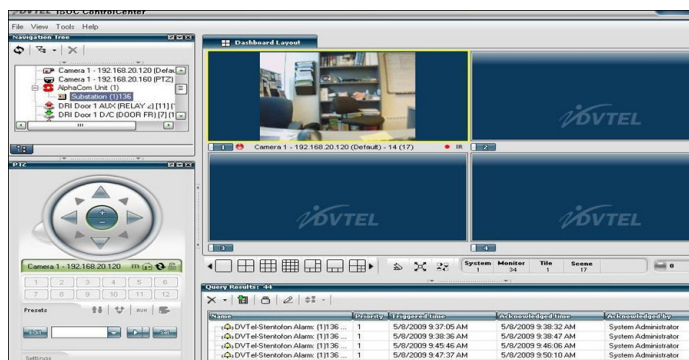

Stentofon provides audio communication solutions. This integration is between Stentofon AlphaNet devices and DVTel's Latitude NVMS.

Each sub-station can be associated with a Latitude NVMS camera.

Stentofon Alarms

Integration triggers DVTel alarms initiated by Stentaphon station calls. The camera selected in the substation is added to the alarm to "View Live" in a ControlCenter tile once the alarm is triggered.

State Events

You can configure an action to execute for accessible or inaccessible events that occur by modifying the appropriate event in the Station Action tab.
